Consent Form for Participation in Research

Serhii Hamotskyi   **HumanResponseBot**
serhii@serhii.net   anilev6@users.noreply.github.com

What Will Happen if You Take Part in this Research?

As a participant (contributor), you will be asked to interact with the Telegram bot, answering single-choice questions. This process will enable us to collect statistics and compare the behavior of the Language Learning Model (LLM) under consideration to actual human behavior statistics.

Data Collection

The following data will be collected as part of this research:

- Telegram ID, nickname and other Telegram account data for verification of human participation.

- Logs of events, such as button presses.

- The name and email address provided during registration to the study Label Studio instance

Use of Data

The data collected will be used solely for research documenting purposes. This will facilitate transparency in the study.

Confidentiality and Privacy

Your privacy is of utmost importance to us. Data will be stored securely and will be accessible only to the research team (except the username and email provided in the Label Studio instance, which will be viewable to all study participants) or for various possible legal and/or academic purposes, such as academic integrity check by the supervisors. Unfortunately, due to the nature of the data collected, the right to be forgotten cannot be fully realized, and data rotation would take years, considering the possible necessity to verify human participation.

Consent

By proceeding with the study, you acknowledge that:

- You have read this consent form, understand the information provided, and agree to participate under these conditions.

- You consent to the storage and processing of all data previously provided by you for this research, if applicable.

- You confirm that you are a Ukrainian native speaker.

Agreement

To proceed, click the 'Continue' button. To exit, press the 'Exit' button.
Thank you for your participation.
